DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to show an apparatus for generating quadrature phase signals, comprising: a four base clock output terminals for outputting a first, a second, a third and a fourth base clock signals, a phase difference between said first and said second base clock signals being substantially equal to a phase difference between said third and said fourth base clock signals, a phase difference between the first and the third base clock signals being substantially 90 degrees, a phase difference between the second and the fourth base clock signals being substantially 90 degrees; a first phase interpolator having two phase input terminals for respectively receiving the first and the second base clock signals, the first clock signal having a frequency equal to the frequency of the first and the second base clock signals and having a phase being a weighted average of the phases of the first and the second base clock signals; and a second phase interpolator having a two phase input receiving the third and the fourth base clock signals, the second clock signal having frequency equal to the frequency of the third and the fourth base clock signals and having a phase being a weighted average of the phases of the third and the fourth base clock signals as called for in claim 1, 5, 10 and 11. Therefore, claims 1-14 are presently allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
